Traffic rules for bicycles in Denmark (most important national rules)

Keep to the right side of the road. If there is a broad white stripe you have to stay to the right of that one

Bicycle Path are mandatory, so you have to ride on the bicycle path if there is one. Bicycle paths are marked with blue signs or with painted white bicycles on the path.

Lights have to be on from sunset to sunrise.

Left turns on bicycle are not allowed. You have to go straight across, then wait for traffic to clear, and then go straight again in the new direction.

Open/cosing times of control as a guide as only final time counts

The route sheet is a turn by turn guide to follow the route without GPS

Cable tie codes on traffic signs

A few places the control is cable ties attached to a sign post (example below)

Above three blue cable ties attached to the bottom of a road sign. So the code to write on the control card is: B-B-B

Before the brevet pictures of the actual signs and where on the sign the cable ties are attached will be entered in this document.

Brevetcard

Below is a look on how the Brevetcard looks. It is a 7cm by 13.5 cm book, where the example below is page 3 and 4.

Stamps or codes are preferable. Receipts can be used as a backup. And photos of your bike at a recognizable place. Photos have to be e-mailed to me.

Finish

The finish is at my home, where there will be coffee, cake etc. if you text me from Kirke Såby or Roskilde, so I will know when to expect you.
